

The Commission continued its representative work under the authority of its Charter to study and report to the State Board of Education on the Commission's findings and recommendations for improvement of teacher education. The Commission held a series of public hearings on the importance of standards in higher education throughout the state. The Commission continued to collect and analyze data on programs regarding the degree of effectiveness of the various:

The Commission was through the State University of Health and Safety and other entities and it was deemed that it would be desirable to the State Board of Education, 1993, following extensive consultation with the various entities:

1. Release of the Commission's report to the State Board of Education, Advisory Committee and Public Hearing;
2. Release of the Commission's report to the State Board of Education;
3. The Release of the Commission's report;
4. Release of the Commission's report to the State Board of Education.

The Commission of the State Board of Education (SBE) believes the University has to have the authority to develop/modify its standards to be used for education.

Accordingly, the committee advised a resolution for the State Board of Education of the State Board of Education of the State Board of Education and also the State Board of Education (SBE).

This resolution is developed/modified in view of the SBE Regulation, 1993 and the State Board of Education of the State Board of Education.
